

SLH MANUAL HORIZONTAL SLIDING TRANSACTION WINDOW SYSTEM

Offering innovative solutions for bullet, blast, impact and wind resistance.

FEATURES

- Glazing is rated for Threat Level 1, 2, or 3 based on UL752 Ballistic Standards
- Wide range of sizes available
- Variety of finishes available
- Delivered complete and ready for installation
- Fabricated from UL listed bullet resistant glazing material
- Full vision through unit

PRODUCT DESCRIPTION

Insulgard's SLH horizontal slider can be constructed from materials designed to help combat ballistic assaults from Level 1, 2 or 3 handguns per UL752 Ballistics Standards. The sliding panel can be opened to allow the passage of packages, contact with customers, and better voice transmission during periods of low threat. If a threat is detected, the sliding panel can be closed and locked. In the locked position the full vision panel still allows for voice transmission and currency exchange.

CONSTRUCTION

The SLH horizontal slider consists of fixed and sliding transparent bullet resistant panels to secure an opening, along with the aluminum framework, hardware, and fasteners needed for installation.

Glazing

Glazing materials can be rated for Threat Level 1, 2 or 3 per UL752 Ballistics Standards.

UL752 Ballistic Rating Options

- UL Level 1: 1 ¼" Acrylic
- UL Level 2: 1 ¾" Acrylic
- UL Level 3: 1 ¼" Lexgard® SP1250

Finishes

- Clear anodized
- Dark bronze anodized
- Painted aluminum

Frame

- 1 ¾" x 4" aluminum tube jams and head
- Glazing channel surrounds the bullet resistant fixed panel

APPLICATIONS

- Convenience stores
- Gas stations
- Food service establishments
- Law enforcement facilities
- Other "at risk" facilities

Each end user should determine their ballistic threat and identify the appropriate product(s) to resist that threat.

NOTE

This unit was not tested as an assembled product. Only specific items are tested or rated.

Component ratings are available upon request.
