BY INSULGARD

ROTARY PACKAGE PASSER

Innovative Counter Line Solutions for Ballistic Protection

PRODUCT DESCRIPTION

The Insulgard Rotary Package Passer is constructed from materials designed to help combat ballistic assaults from Level 1 handguns per UL752 Ballistics Standards. The revolving inner package passer rotates from side to side, allowing packages to be passed through the barrier without a breach of security.

STANDARD SIZES

- Box OD 16" W x 16" H x 12½" D

NOTE

This unit was not tested as an assembled product. Only specific items are tested or rated. Component ratings are available upon request.

FEATURES

- Fabricated from Level 1 listed materials per UL752 standards
- A variety of sizes available
- Stainless steel sides
- Delivered assembled and ready for installation
- Through vision passer

APPLICATIONS

- Convenience store
- Food service establishments
- Any parcel passer locations
- Other "at risk" facilities

Each end user should determine their ballistic threat and identify the appropriate product(s) to resist that threat.

BOX CONSTRUCTION

- An outer rectangular shaped shell is lined with bullet resistant materials and features openings at two sides.
- The interior revolving three-sided radius unit is also constructed from bullet resistant material plus a clear vision on the fourth side. The unit revolves back and forth from customer side to secure side, providing a package passer function. A ball bearing mechanism allows for easy rotation.
- Tops and bottoms are UHMW plastic.
- Hardware is stainless steel including crank handle.

GLAZING

- Glazing materials are rated based on UL752 Ballistics Standards for specified bullet resistance.
- Bullet Resistant Glazing
UL Level 1: 1¼" Acrylic
